

COMPANY PROFILE

We Love Playing with New challenges

We are a digital creative agency based in New Delhi(India), that approaches each project with the same curiosity we had when we were kids, just with a bit more experience, method and precision. Be curious, talk simple, play fair, share everything.

We are driven by **Curiosity,** inspired by **Creativity**

We have worked on new ways of communicating and new digital solutions since 2005, always trying to invent something different. We mix creativity, usability and millions of lines of code with the objective of delivering a unique experience. Something new with every project.

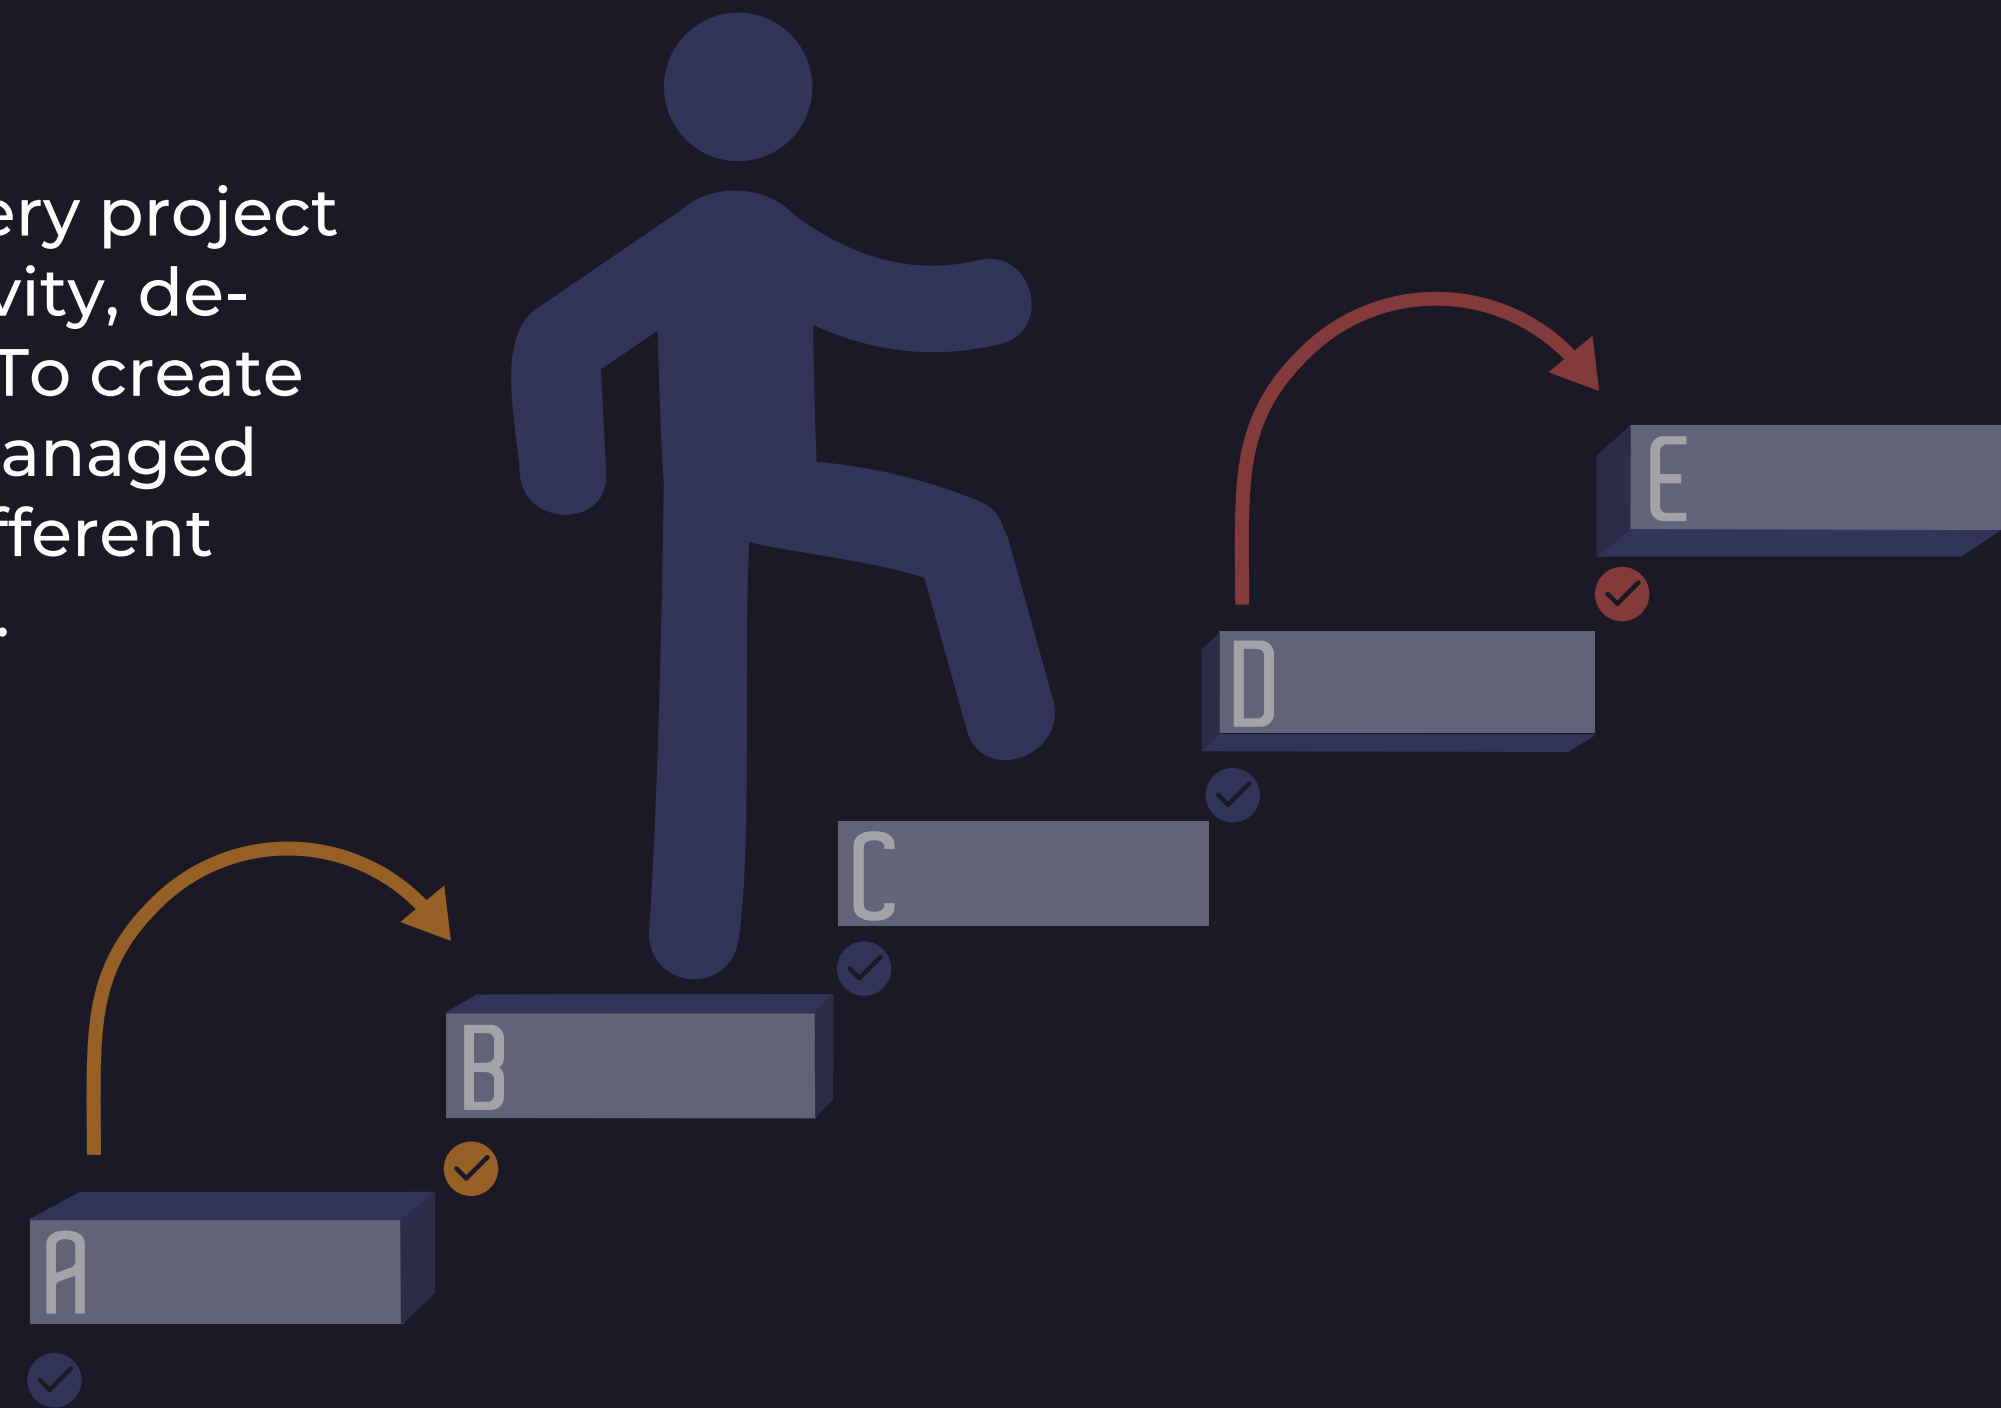

We love Getting Closer

We like long term relationships even more. To make a relationship last, a strong connection is the key. Knowing each other, building a consistent approach, taking an in-depth look at the scenario. This is why we like to build good relationships with our customers, to understand their needs and work together on innovation, strategy and brand culture. And add value through measurable objectives.

We Do it Step By Step

We're having good dancer's. Waltzing through every project like a well-choreographed routine: strategy, creativity, development, system integration and maintenance. To create results, step-by-step. And because everything is managed internally, we can make decisions that leverage different skills. Which is why we know how to rock the floor.
